STATE WATER RESOURCES CONTROL BOARD

DIVISION OF WATER RIGHTS

PERMIT FOR DIVERSION AND USE OF WATER

PERMIT 21013

Application 30611 of Ernest W. and Janice A. Leroy and Lyle and Sharon Brown
306 Bar W Road, Carlotta, CA 95528

filed on April 14, 1997, has been approved by the State Water Resources Control Board SUBJECT TO
PRIOR RIGHTS and to the limitations and conditions of this permit.

Permittee is hereby authorized to divert and use water as follows:

1. Source of water

Source	Tributary to
POD No. 1 Unnamed Stream (aka West Branch Pip Creek)	Pip Creek (aka Pipe Creek) thence
	Van Duzen River
POD No. 2 Pip Creek	Van Duzen River

2. Location of point of diversion

By California Coordinate System in Zone 1	40-acre subdivision of public land survey or projection thereof	Section (* Projected)	Township	Range	Base and Meridian
1) North 415,150 feet and East 1,482,500 feet	SW¼ of SE¼	17	1N	3E	MD
2) North 414,900 feet and East 1,483,750 feet	SE¼ of SE¼	17	1N	3E	MD

County of Humboldt

3. Purpose of use	4. Place of use	Section	Township	Range	Base and Meridian	Acres
Stockwatering Domestic Irrigation	NW¼ of SW¼	16	1N	3E	MD	6
	NE¼ of SE¼	17	1N	3E	MD	1.5
	SE¼ of NE¼	17	1N	3E	MD	2.5
					TOTAL	10

The place of use is shown on map on file with the State Water Resources Control Board.

This permit is subject to the following terms and conditions:

5. The water appropriated shall be limited to the quantity which can be beneficially used and shall not exceed **3600 gallons per day/3.94 acre-feet per annum** by direct diversion from **January 1 to December 31** of each year for **Domestic** purposes; **300 gallons per day/0.34 acre-feet per annum** by direct diversion from **January 1 to December 31** of each year for **stockwatering** purposes. **11,600 gallons per day/5.34 acre-feet per annum** by direct diversion from **May 1 to October 15** of each year for **irrigation** purposes. The maximum amount diverted under this permit for all uses shall not exceed **9.62 acre-feet per year**.

(0000005B)

6. For the protection of wildlife and riparian habitat, permittee shall bypass sufficient streamflow to maintain a continuous thread of surface flow from the permittee's point of diversion to the Van Duzen River.

(0140400)

7. Before relocating point of diversion #2 above the points of diversion under Small Domestic Use Registrations No. D030571R and D030572R, Permittee shall install and maintain a bypass facility or water delivery system of adequate capacity above their permitted Point of Diversion to deliver water when water is being appropriated under Small Domestic Use Registrations No. D030571R and D030572R. Before starting construction, permittee shall submit plans and specifications of the bypass facility to the Chief of the Division of Water Rights for approval. Upon completion of construction, permittee shall furnish evidence, which substantiates that a suitable bypass facility has been installed in Pip Creek. Evidence shall include photographs showing completed works or certification by a registered Civil or Agricultural Engineer.

(0160400)

8. All permits issued by the State Water Resources Control Board are subject to the following terms and conditions:

(A) Permittee shall maintain records of the amount of water diverted and used to enable the State Water Resources Control Board to determine the amount of water that has been applied to beneficial use pursuant to Water Code Section 1605.

(B) The amount authorized for appropriation may be reduced in the license if investigation warrants.

(C) Progress reports shall be submitted promptly by permittee when requested by the State Water Resources Control Board until a license is issued.

(D) Permittee shall allow representatives of the State Water Resources Control Board and other parties, as may be authorized from time to time by said Board, reasonable access to project works to determine compliance with the terms of this permit.

(E) Pursuant to California Water Code Sections 100 and 275, and the common law public trust doctrine, all rights and privileges under this permit and under any license issued pursuant thereto, including method of diversion, method of use, and quantity of water diverted, are subject to the continuing authority of the State Water Resources Control Board in accordance with law and in the interest of the public welfare to protect public trust uses and to prevent waste, unreasonable use, unreasonable method of use, or unreasonable method of diversion of said water.

The continuing authority of the Board may be exercised by imposing specific requirements over and above those contained in this permit with a view to eliminating waste of water and to meeting the reasonable water requirements of permittee without unreasonable draft on the source. Permittee may be required to implement a water conservation plan, features of which may include but not necessarily be limited to (1) reusing or reclaiming the water allocated; (2) using water reclaimed by another entity instead of all or part of the water allocated; (3) restricting diversions so as to eliminate agricultural tailwater or to reduce return flow; (4) suppressing evaporation losses from water surfaces; (5) controlling phreatophytic growth; and (6) installing, maintaining, and operating efficient water measuring devices to assure compliance with the quantity limitations of this permit and to determine accurately water use as against reasonable water requirements for the authorized project. No action will be taken pursuant to this paragraph unless the Board determines, after notice to affected parties and opportunity for hearing, that such specific requirements are physically and financially feasible and are appropriate to the particular situation.

The continuing authority of the Board also may be exercised by imposing further limitations on the diversion and use of water by the permittee in order to protect public trust uses. No action will be taken pursuant to this paragraph unless the Board determines, after notice to affected parties and opportunity for hearing, that such action is consistent with California Constitution Article X, Section 2; is consistent with the public interest; and is necessary to preserve or restore the uses protected by the public trust.

(F) The quantity of water diverted under this permit and under any license issued pursuant thereto is subject to modification by the State Water Resources Control Board if, after notice to the permittee and an opportunity for hearing, the Board finds that such modification is necessary to meet water quality objectives in water quality control plans which have been or hereafter may be established or modified pursuant to Division 7 of the Water Code. No action will be taken pursuant to this paragraph unless the Board finds that (1) adequate waste discharge requirements have been prescribed and are in effect with respect to all waste discharges which have any substantial effect upon water quality in the area involved, and (2) the water quality objectives cannot be achieved solely through the control of waste discharges.

(G) This permit does not authorize any act which results in the taking of a threatened or endangered species or any act which is now prohibited, or becomes prohibited in the future, under either the California Endangered Species Act (Fish and Game Code sections 2050 to 2097) or the federal Endangered Species Act (16 U.S.C.A. sections 1531 to 1544). If a "take" will result from any act authorized under this water right, the permittee shall obtain an incidental take permit prior to construction or operation. Permittee shall be responsible for meeting all requirements of the applicable Endangered Species Act for the project authorized under this permit.

This permit is issued and permittee takes it subject to the following provisions of the Water Code:

Section 1390. A permit shall be effective for such time as the water actually appropriated under it is used for a useful and beneficial purpose in conformity with this division (of the Water Code), but no longer.

Section 1391. Every permit shall include the enumeration of conditions therein which in substance shall include all of the provisions of this article and the statement that any appropriator of water to whom a permit is issued takes it subject to the conditions therein expressed.

Section 1392. Every permittee, if he accepts a permit, does so under the conditions precedent that no value whatsoever in excess of the actual amount paid to the State therefor shall at any time be assigned to or claimed for any permit granted or issued under the provisions of this division (of the Water Code), or for any rights granted or acquired under the provisions of this division (of the Water Code), in respect to the regulation by any competent public authority of the services or the price of the services to be rendered by any permittee or by the holder of any rights granted or acquired under the provisions of this division (of the Water Code) or in respect to any valuation for purposes of sale to or purchase, whether through condemnation proceedings or otherwise, by the State or any city, city and county, municipal water district, irrigation district, lighting district, or any political subdivision of the State, of the rights and property of any permittee, or the possessor of any rights granted, issued, or acquired under the provisions of this division (of the Water Code).
